

## Senior PHP Web Developer

We are looking for a talented and experienced senior PHP developer to expand our team in the Chelmsford office.

### RESPONSIBILITIES

You will play a leading role in all web development aspects of our projects, helping to steer the technical strategy for our projects and the company. Project scoping and time estimates are also essential aspects of the role.

### KNOWLEDGE / EXPERIENCE

#### Essential:

- Excellent PHP programming skills including OOP, HTTP principles and PHP optimisation
- 5+ years commercial experience with the work to match
- Strong JavaScript skills
- Excellent knowledge of MySQL database design and development
- Experience in both creating custom API's and parsing API data
- Familiarity with Linux shell
- Ability to work autonomously and manage your workload and deadlines effectively
- A relentless drive for efficiency, performance and speed throughout all your work
- Willingness to undertake competency tests as part of the interview process
- Very good written and verbal English communication skills
- Ability to work on-site at our Chelmsford Office

#### Desirable but not essential:

- Experience with cloud infrastructure such as AWS
- Experience with Nginx
- Experience with Craft CMS
- Experience with Laravel and/or Symfony
- Experience with C#/ASP.net
- Experience working with front-end JavaScript frameworks such as Vue.js or React
- Project management experience
- Knowledge of Git version
- Knowledge of SEO

### WHAT WE OFFER

- A great salary, commensurate with experience
- A flexible working atmosphere
- Sizeable and exciting projects to get your teeth into that have real potential for growth
- Modern office located in Chelmsford

### HOW TO APPLY

This is a permanent position with an initial 3 month probationary period. Please send your personal letter highlighting your competence for the role along with your CV to [jobs@armchairpartners.com](mailto:jobs@armchairpartners.com).

**NO RECRUITMENT AGENCIES OR CONSULTANCY FIRMS PLEASE!**
